1 Contains all the elements you want to display on a slide (similar to a template) and is where all the formatting of all slides can be controlled.

2 A location on a slide where information is to be entered.

3 A print option that allows you to print up to nine slides on a single page.

4 Displaying objects or components of a slide in sequence to produce movement.

5 The area in the normal view that you use to view and work with slide elements, such as text or objects.

6 Refers to the arrangement of placeholders for a slide.

7 Supporting data, quotations, or illustrations that you can use when giving a presentation.

8 Brings one item at a time into a slide and is a technique that can help to keep your audience from reading ahead.

9 Prints only the text of slides in an outline format.

10 The default setting that allows you to work on an individual slide.

11 How one slide enters or exits the screen.

12 F5 turns this feature on.

13 Displays all slides in the presentation in miniature and allows you to move, rearrange, and delete slides easily.

14 A slide option that uses its own unique set of colors, fonts, and effects to create the overall look and feel of your slides.
